SUMMARY

Full-Stack Engineer with 3 years of experience building production web applications, analytics platforms, and e-commerce solutions. Experienced in React, Next.js, JavaScript, GA4, data visualization, API integrations, responsive UX/UI, and backend development. Currently developing Vizantra, an analytics and reporting SaaS platform integrating GA4, Google Search Console, and Meta Ads data into customizable dashboards and shareable reports. Experienced in independently implementing, debugging, optimizing, and iterating on production web experiences using AI-augmented development workflows.

EXPERIENCE

Full Stack Engineer — Vizograph Solutions

October 2024 - Present

- Progressed from frontend development into full-stack engineering, building production applications across React, Next.js, Node.js, Hono, PostgreSQL, MongoDB, and REST APIs.
- Built a custom chart editor using React and ApexCharts.js with interactive chart types, drag-and-resize functionality, dynamic datasets, real-time customization, and PNG/SVG/JPEG export.
- Built StyleCreation, a full-stack garment workflow management system covering order lifecycle, vendors, products, production stages, analytics dashboards, search/filtering, responsive interfaces, and AWS S3 image storage.
- Developing Vizantra, an analytics and reporting SaaS platform integrating GA4, Google Search Console, and Meta Ads data into customizable dashboards, templates, data visualizations, and reporting workflows.
- Implemented analytics dashboards and shareable client reports, enabling users to present and distribute performance data through customizable reporting experiences.
- Work across frontend UX/UI, backend APIs, analytics integrations, database architecture, application workflows, debugging, and AI-augmented development.

React Developer, WanBuffer Services

September 2023 - August 2024

- Developed production web interfaces and user-management workflows using React, JavaScript, HTML, CSS, and API integrations.
- Built an e-commerce frontend with responsive UX/UI, product/category navigation, API-driven data, and user-facing workflows.
- Improved contract management and document workflows through frontend-backend integration, authentication, and email verification.
- Created dynamic navigation and data-driven interfaces with API integrations to improve browsing and usability.

HACKATHON FINALIST

Workspace Management & Library Management System

- Selected as a finalist in the Odoo Hackathon.
- Built a complete admin panel with authentication and user management.
- Developed multiple pages including Home, Workspace, Booking, and Dashboard.
- Implemented features like pagination, filtering, and structured data management.

PROJECTS

Vizantra — Analytics & Reporting SaaS

Next.js, React, Hono, PostgreSQL, Neon, GA4, Google Search Console, Meta Ads

- Developing an agency analytics and reporting platform that consolidates website and marketing performance data into customizable dashboards.
- Integrated GA4, Google Search Console, and Meta Ads data sources for centralized performance reporting.
- Built customizable dashboard templates with charts, tables, KPI cards, filters, date ranges, and data visualizations.
- Developed shareable dashboard/report experiences for presenting analytics to clients.
- Designed analytics views around metrics and dimensions used to evaluate traffic, acquisition, engagement, conversions, and campaign performance.

Style Creation – Garment Workflow Management System

stylecreation.in

React, Node.js, Express.js, MongoDB, Mongoose

- Built a full-stack production management system for tracking garment orders from entry through vendor operations and production stages.
- Developed modules for samples, sets, photos, washing, alterations, factory-ready stock, and outward workflows.
- Built analytics dashboards and management interfaces for monitoring production and operational data.
- Implemented advanced search/filtering and responsive interfaces for managing large sets of business data.
- Integrated AWS S3 for image upload and storage workflows.

ApexCharts Editor — Interactive Chart & Visualization Editor

React, JavaScript, ApexCharts.js, Zustand, Tailwind CSS

- Built the frontend of an interactive browser-based chart editor, enabling users to create and customize data visualizations through a visual drag-and-drop editing experience without writing code.
- Implemented support for a broad range of chart types including line, area, bar, column, stacked charts, pie, donut, funnel, radar, heatmap, treemap, scatter, bubble, and other ApexCharts visualizations.
- Built data-management interfaces for adding/removing rows and columns, editing datasets, importing CSV data, and dynamically updating chart visualizations.
- Implemented extensive chart customization controls covering chart themes, colors, typography, axes/grid, chart options, fills, labels, markers, legends, backgrounds, and styling.
- Implemented chart export workflows supporting PNG, SVG, and JPEG output for sharing and presentation-ready visualizations.

EDUCATION

Diploma in Information Technology

Aditya Silver Oak Institute of Technology

July 2019 - July 2022

CGPA - 8.50

SKILLS

Frontend: React, Nextjs, JavaScript, HTML, CSS, TypeScript, Tailwind CSS, shadcn/ui, Zustand, Redux Toolkit

Backend: Node.js, Express.js, Hono, REST APIs

Database: PostgreSQL, MongoDB, Mongoose, Neon

Tools: Git, Github, Claude Code, Cursor, Codex

Analytics & Data: Google Analytics 4 (GA4), Data Visualization, Dashboard Development
