SUMMARY

Full-Stack Engineer focused on building production web applications and SaaS products using React, Next.js, Node.js, Hono, PostgreSQL, MongoDB, and modern web technologies. Experienced across frontend development, backend APIs, databases, integrations, and application architecture. Uses AI-augmented development workflows to accelerate implementation while remaining responsible for technical decisions, debugging, validation, and delivery.

EXPERIENCE

Full Stack Engineer — Vizograph Solutions

September 2025 - Present

- Built StyleCreation, a full-stack garment workflow management system using React, Node.js, Express.js, and MongoDB.
- Developing Vizantra, an analytics and reporting SaaS platform using Next.js, Hono, PostgreSQL, and Neon.
- Work across frontend, backend APIs, databases, integrations, application architecture, and AI-augmented development.

Frontend Developer — Vizograph Solutions

October 2024 - September 2025

- Built a custom chart editor using React and ApexCharts.js supporting multiple interactive chart types.
- Implemented drag-and-resize interfaces, dynamic dataset management, and real-time chart customization.
- Developed PNG, SVG, and JPEG export functionality with responsive and light/dark mode support.

React Developer, WanBuffer Services

September 2023 - August 2024

- Developed document and user management features, including adding/viewing PDFs and images.
- Integrated Google/Microsoft authentication, enhancing security and access convenience.
- Improved contract management workflows by developing robust frontend-backend integration.
- Developed a seamless email verification interface and an intuitive ecommerce frontend, enhancing authentication and user experience.
- Created a dynamic Mega Menu with smooth transitions and integrated it with APIs to fetch and display category data in real time.
- Developed an interactive Spin & Win game using React, improving engagement during company events.

HACKATHON FINALIST

Workspace Management & Library Management System

- Selected as a finalist in the Odoo Hackathon.
- Built a complete admin panel with authentication and user management.
- Developed multiple pages including Home, Workspace, Booking, and Dashboard.
- Implemented features like pagination, filtering, and structured data management.

PROJECTS

Vizantra — Analytics & Reporting SaaS

Next.js, React, Hono, PostgreSQL, Neon

- Developing an analytics and reporting SaaS platform for agencies with customizable dashboards, templates, data visualization, and reporting workflows.
- Building across frontend interfaces, backend APIs, database architecture, integrations, and organization-based application workflows.

Style Creation – Garment Workflow Management System (MERN Stack)

stylecreation.in

- Built a full-stack production workflow system for tracking garment orders, vendors, products, and production stages.
- Developed workflow tracking, analytics dashboards, management modules, advanced search/filtering, and responsive interfaces.
- Integrated AWS S3 for image uploads and storage.

AI Jurist – Contract Management Platform

Developed a digital contract system supporting multi-party agreements, cloud storage integration, and providing support for multiple languages, including English, Arabic, French, and Spanish.

Plugi - Email Verifier

Developed a web application that verifies email addresses in real-time and integrates third-party email verification services.

Spin Game

Developed a Spin and Win web application using React.js, specifically designed with a mobile-first approach to provide an optimal user experience on mobile devices. The app features an interactive spinning wheel with smooth animations and real-time feedback, allowing users to win various rewards. This project showcases my skills in creating responsive designs and delivering engaging, mobile-friendly web applications.

Xora

Created a React Native mobile application using Expo, with Appwrite serving as the backend for authentication, database management, and file storage. The app enables users to upload and play videos, manage content dynamically, and enjoy a seamless interaction with a responsive user interface. Emphasized providing a smooth user experience through optimized performance and cross-platform compatibility.

EDUCATION

Diploma in Information Technology

Aditya Silver Oak Institute of Technology

July 2019 - July 2022

CGPA - 8.50

SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, Tailwind CSS, shadcn/ui, Zustand, Redux Toolkit

Backend: Node.js, Express.js, Hono, REST APIs

Database: PostgreSQL, MongoDB, Mongoose, Neon

Tools: Git, Github
